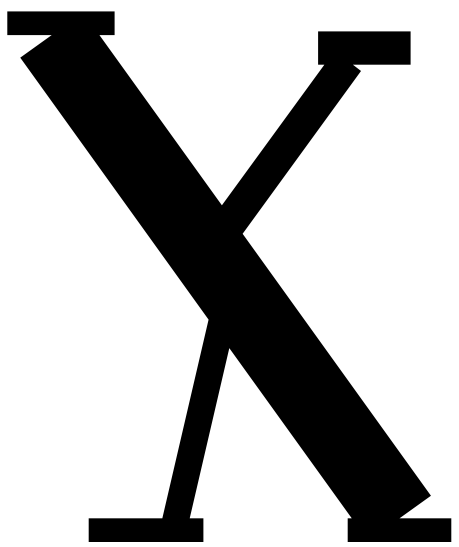
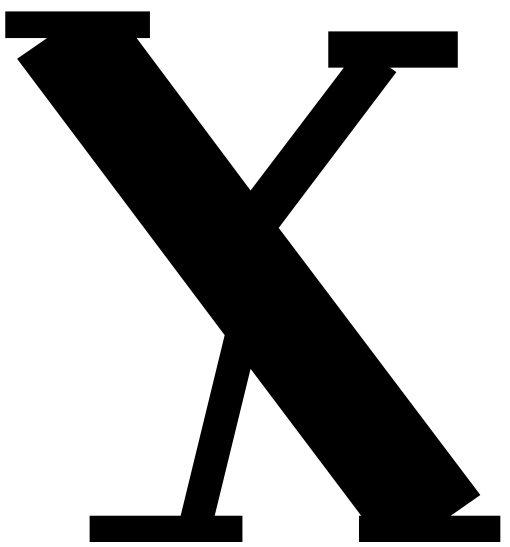
Bold aleph א — square serif ends restored, 2026-10-25

Four corner moves restore the source rectangles; the diagonal, arm, leg, width and anchors are retained.

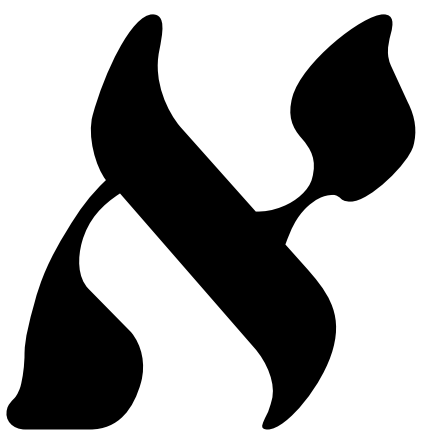
Regular



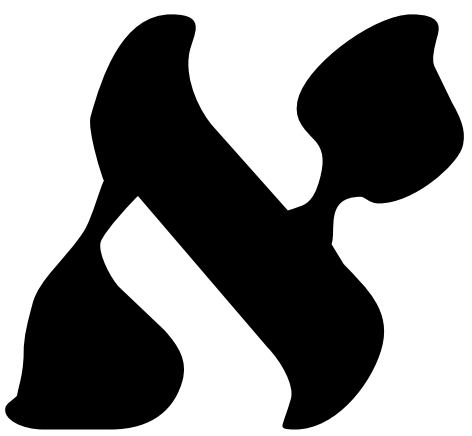
Bold / repaired



Italic



BoldItalic

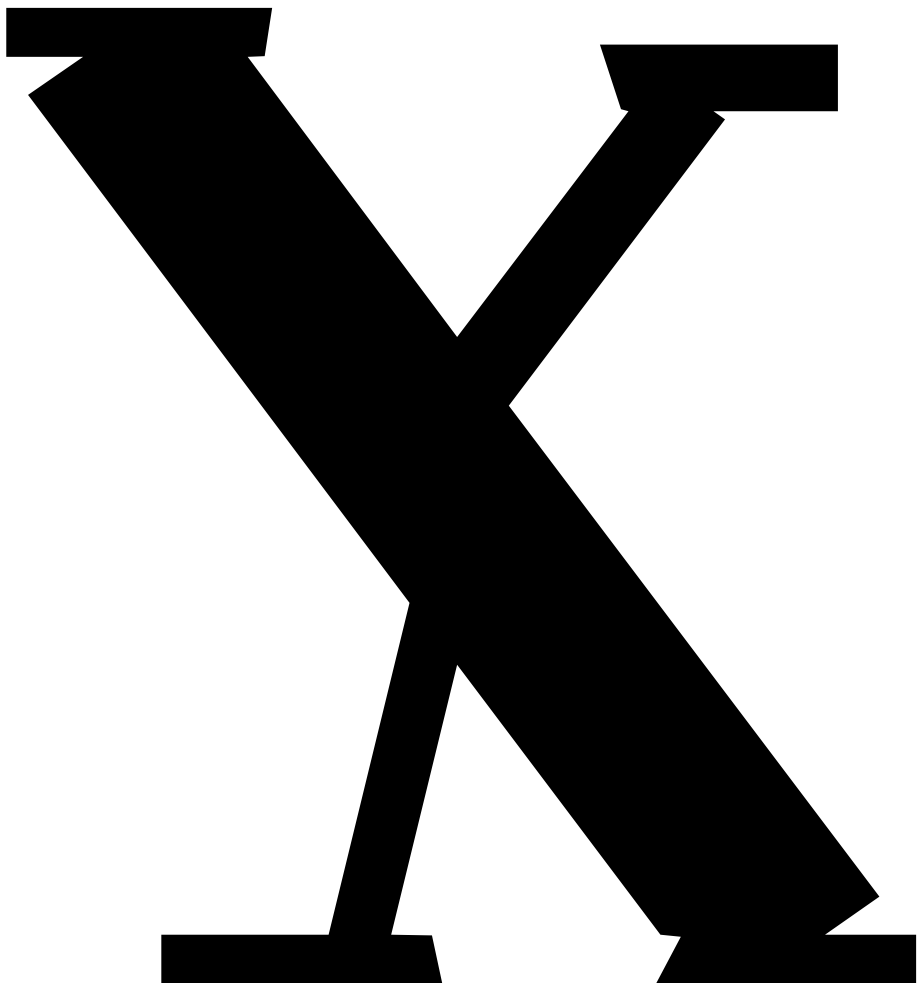


Roman source: draft_letterlike.alef(), straight strokes plus four rectangular serifs.

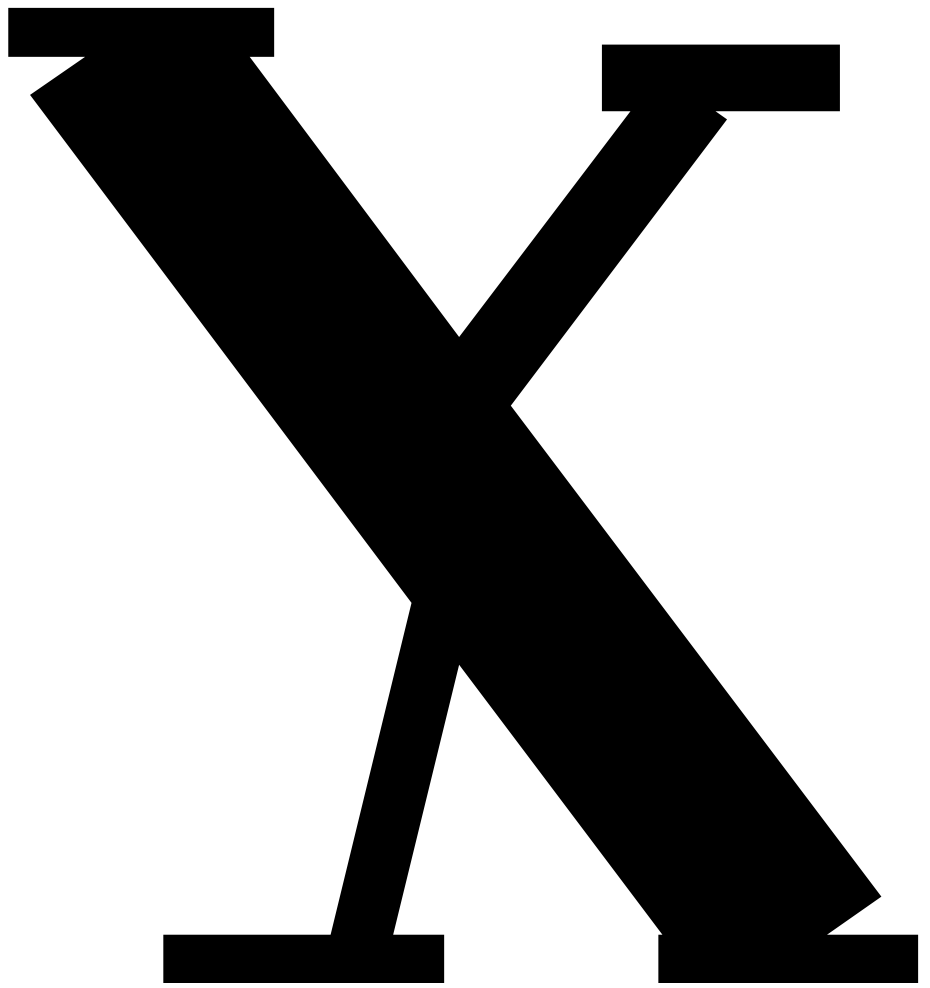
Its outline matches Regular exactly after a −20-unit x translation. Libertinus Math supplies Fraktur, not this א.

Italic comes from Old Standard; its previously repaired curved returns are a separate construction.

Bold before



Bold after



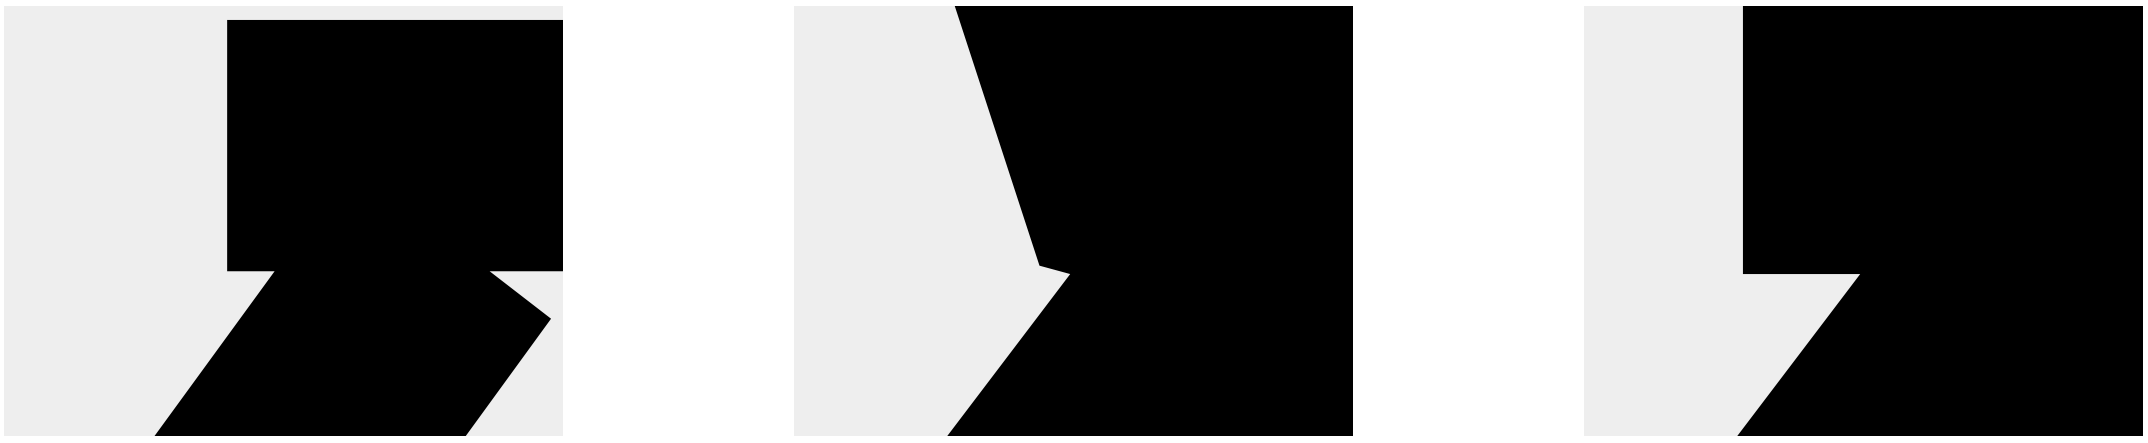
Lint: four ledges → two inherited lips (6 and 21 units). No added exceptions; no recorded final visual acceptance.

Serif and diagonal joins — equal-scale details

Grey is outside the ink. Rows 1–3 and 5 change one corner each; row 4 remains unchanged.

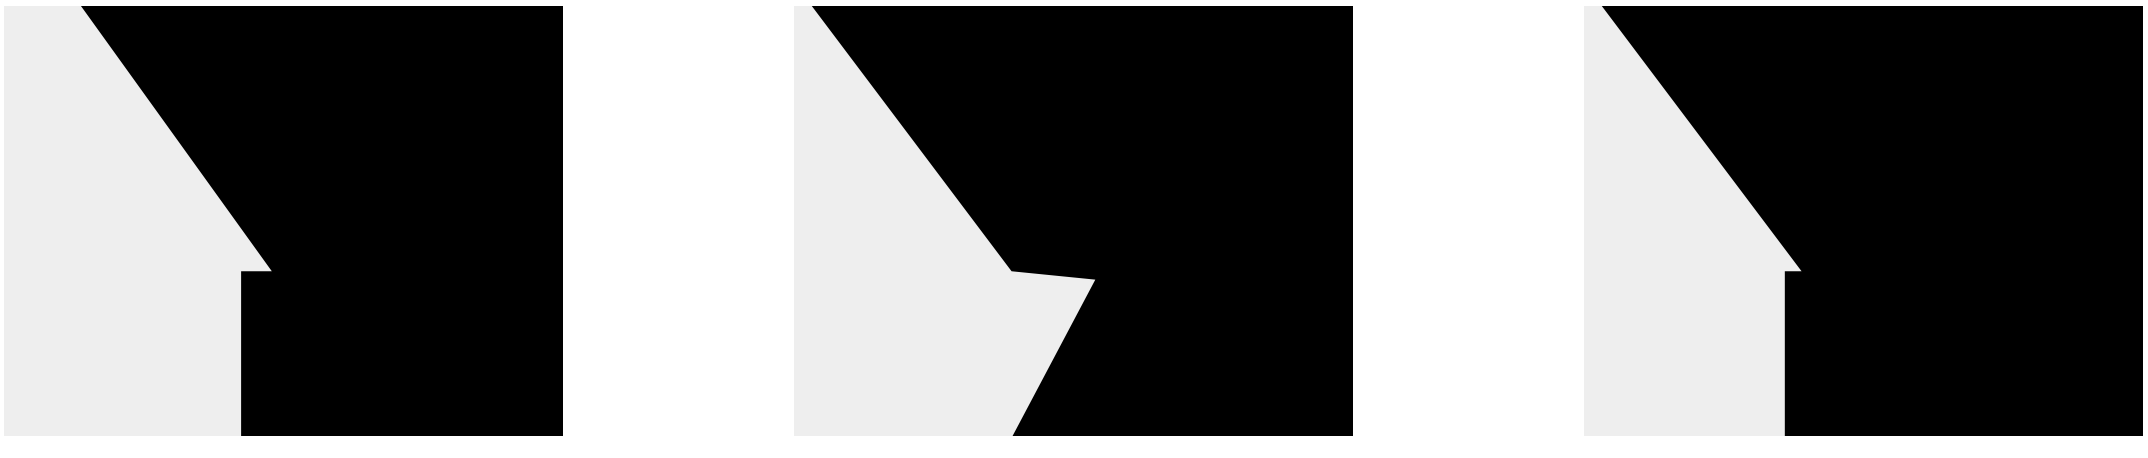
Regular source	Bold before	Bold after

Upper-right serif / left end: formerly 11-unit ledge



Upper-left serif / right end: formerly 25-unit ledge

Lower-right foot / left end: reversed 30-unit ledge → outward 6-unit lip



Upper-right arm / serif: inherited diagonal-cap lip retained, 21 units

Lower-left foot / right end: unflagged tilted edge restored
