Bold modifier glottal stop ʾ — lint review, 2026-10-25

Current source outlines. Recommendation: retain the upper open cusp; drawing quality remains separate.

Recipe family at equal em size: question → ʔ → ɂ → ʾ

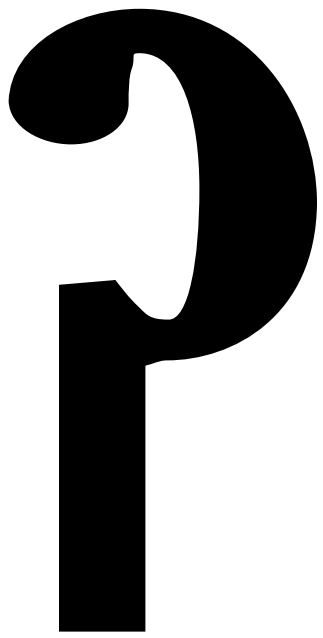
Regular

Bold

Modifier enlarged at equal em size

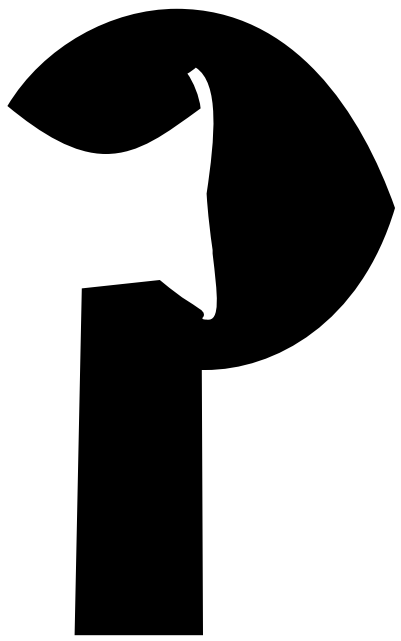
Regular / current

Advance 363; no notch finding



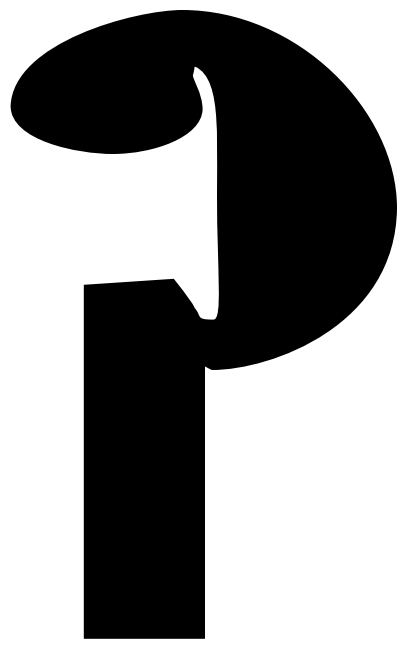
Bold / current

Advance 449; notch 222,1097 — 47 px

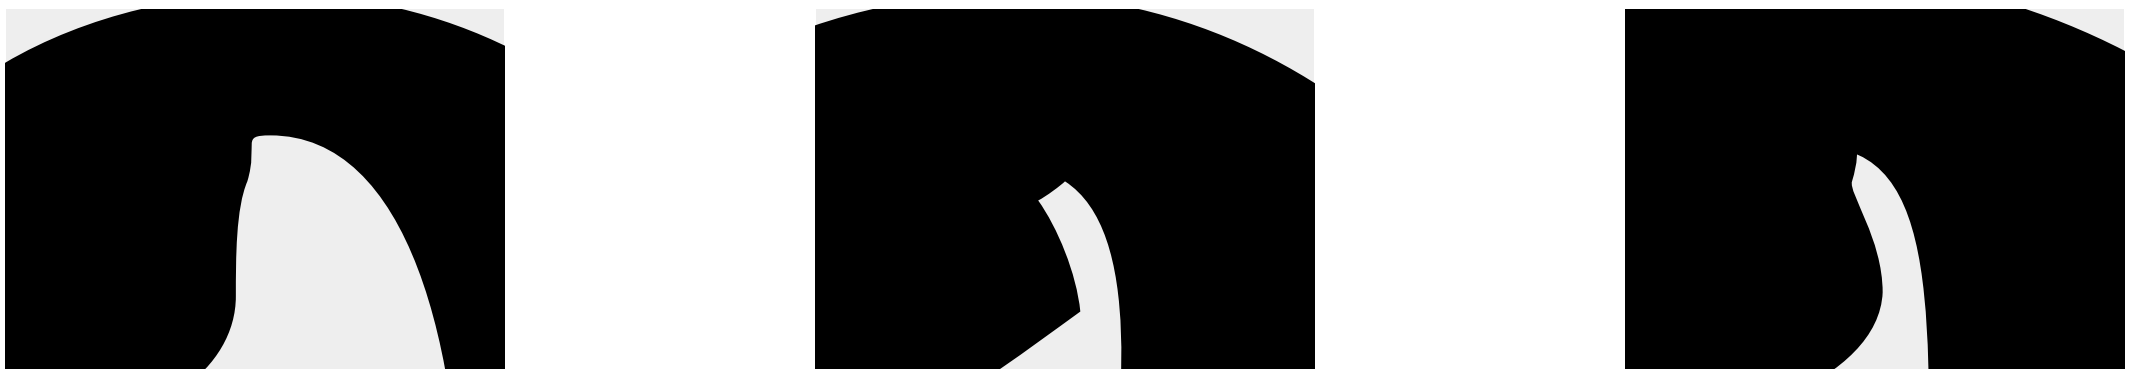


Bold / scratch recipe rebuild

Advance 380; notch 184,1093 — 55 px



Upper ball-terminal joins — same coordinate scale



The white cusp remains after a smoother scratch rebuild; it is an open counter tip, not an enclosed hole.
Scratch only: derive.superior(final Bold ɂ), with its normal fitting. No source or production font was changed.
Outer bowl/ball corners and the inner edge need a separate drawing review; scratch width differs by 69 units.

Current Bold ʾ at 12 / 24 / 48 pt (actual outlines, no fallback font)
